

Please amend the present application as follows:

Claims

The following is a copy of Applicant's claims that identifies language being added with underlining ("____") and language being deleted with strikethrough ("———") or brackets ("[[]]"), as is applicable:

1. (Currently amended) A method for facilitating pay printing, the method comprising:

a network-based imaging service storing a scaled-down version of a full-sized document in a personal imaging repository of a user;

a network-based printing service separate from the imaging service receiving a print request from the user;

the printing service automatically identifying the personal imaging repository and automatically retrieving [[a]] via a network the scaled-down version of [[a]] the full-sized document to be printed from at least one store via a network the personal imaging repository;

the printing service receiving print option selections from the user; and

the printing service determining printing costs for printing the full-sized document based upon attributes of the scaled-down version.

2. (Currently amended) The method of claim 1, wherein the ~~at least one store~~ personal imaging repository comprises a graphic store and a composition store.

3. (Currently amended) The method of claim 1, wherein the ~~at least one~~ store personal imaging repository is associated with an imaging source with which the full-sized document is created or identified.

4-6. (Canceled)

7. (Previously presented) The method of claim 1, wherein the scaled-down version comprises one or more thumbnails that represent document pages.

8. (Withdrawn) The method of claim 1, wherein the step of accessing imaging data comprises accessing imaging data through use of an imaging extension.

9. (Withdrawn) The method of claim 8, wherein the imaging extension comprises part of a user browser.

10. (Withdrawn) The method of claim 8, wherein the imaging extension comprises part of a network-based pay-for-print service.

11. (Currently amended) The method of claim 1, wherein receiving print option selections comprises receiving ~~user~~ selections with a web site of the network-based printing service.

12. (Previously presented) The method of claim 11, wherein the printing service is supported by a printing device having an embedded server.

13. (Previously presented) The method of claim 1, wherein the determination of the printing costs is dependent upon attributes of the scaled-down version and the option selections.

14. (Withdrawn) The method of claim 1, further comprising the step of initiating printing of the imaging data.

15. (Withdrawn) The method of claim 14, further comprising the step of facilitating billing of a user.

16. (Withdrawn) The method of claim 15, further comprising generating a receipt for the user.

17. (Withdrawn) A system for facilitating pay printing, comprising:
means for accessing imaging data from at least one store via a network;
means for receiving print option selections; and
means for determining printing costs.

18. (Withdrawn) The system of claim 17, wherein the means for accessing imaging data comprise means for retrieving imaging data from the at least one store.

19. (Withdrawn) The system of claim 17, wherein the means for accessing imaging data comprises an imaging extension.

20. (Withdrawn) The system of claim 19, wherein the imaging extension comprises part of a user browser.

21. (Withdrawn) The system of claim 19, wherein the imaging extension comprises part of a network-based pay-for-print service.

22. (Withdrawn) The system of claim 17, wherein the means for receiving print option selections comprise a web site of a network-based pay-for-print service.

23. (Withdrawn) The system of claim 17, further comprising means for initiating printing of the imaging data.

24. (Withdrawn) The system of claim 17, further comprising means for facilitating billing of a user.

25. (Withdrawn) A printing device, comprising:
memory including logic configured to access imaging data from at least one store via a network, receive print option selections, and determine printing costs based upon attributes of the imaging data and the option selections.

26. (Withdrawn) The printing device of claim 25, wherein the logic comprises a network-based imaging service.

27. (Withdrawn) The printing device of claim 26, wherein the imaging service is adapted to retrieve imaging data from the at least one store.

28. (Withdrawn) The printing device of claim 25, wherein the logic comprises an imaging extension that is configured to access the at least one store.

29. (Withdrawn) The printing device of claim 25, further comprising an embedded server.

30. (Canceled)

31. (New) The method of claim 1, wherein determining printing costs based upon attributes of the scaled-down version comprises determining printing costs based upon toner or ink coverage.

32. (New) The method of claim 1, wherein determining printing costs based upon attributes of the scaled-down version comprises determining printing costs based upon the amount of time that printing will require.

33. (New) The method of claim 1, further comprising the printing service, responsive to the print request, downloading content to a user's network browser of the user, the content including generic access instructions that call on an imaging extension of the network browser to access the personal imaging repository.

34. (New) The method of claim 33, wherein the imaging extension of the network browser comprises application programming instructions (APIs) and wherein the call comprises an API call.
